DETAILED ACTION

Priority

1. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Claims

2. Claims 1-10 are present.

Claim Objections

3. Claims 1-10 are objected to because of the following informalities: The “non-yellow” terminology is inconsistent with the description of the safelight at page 9, line 12 – page 10, line 10. According to the specification, the safelight is adjusted to cut out only the light with a wavelength of not more than 440 nm and emits a light-yellow light. Appropriate correction is required.
4. Claim 6 is objected to under 37 CFR 1.75(c), as being of improper dependent form for failing to further limit the subject matter of a previous claim. Applicant is required to cancel the claim(s), or amend the claim(s) to place the claim(s) in proper dependent form, or rewrite the claim(s) in independent form. The “X” group of formula 2 is not represented in formula 1.

Claim Rejections - 35 USC § 112

5. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

6. Claim 6 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

- a. There is no support for the “X” group of formula 2 in formula 1.

Specifically, the “R₂” group of formula 1 is a monovalent substituent (or may be combined with R₁ to form a ring) whereas formula 2 comprises an “X” group in addition to the monovalent substituent “R₃”.

Conclusion

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

a. In US 2003/0198893 A1, Oshima teach a photopolymerizable lithographic printing plate that is exposed to a xenon lamp through an optical filter (abstract; [0198]).

b. In JP 2004295024 A, published October 21, 2004, Takamukai teach an image forming method and photosensitive lithographic printing plate wherein the printing plate is set under a yellow safelight and then exposed to laser light to form an image (abstract).
